Water Stewardship Strategy

Nestlé Waters SuratThani

Our Vision:

We aim to advance in regeneration of water cycle to create positive impact in the communities and province where we operate.

Our mission:

• Nestlé supports the sustainable use of water, strictly controls its utilization in the Company's activities, and strives for continuous improvement in the management of water resources.

• We continuously improve water savings at Nestlé factories by monitoring water ratio and the quality of the water we discharge. Our aim is to ensure the efficient water utilization and prevent water pollution that make by our factory.

• We believe that businesses have a crucial role to play in helping people access to safe water, sanitation, and hygiene (WASH) by placing them at the core of our water stewardship program. By doing so, we work together with stakeholders to address shared water challenges and try best to contribute to the well-being of communities.

Goals:

1) To sustain good water governance

2) To sustain good water balance

3) Continue WASH related activities

4) To sustain good water quality

5) To support Water Regeneration project

6) To comply with AWS standard

7) Continuous improvement of relationship with all stakeholders

8) To support local economical events in the area though employment and social activities
